

## **EQUATOR® PRO WORKFLOW SOLUTION**

Founded in 2003, Equator has become known as an industry-leading asset management, home search, marketing and workflow solution. It is widely adopted by servicers, real estate agents and vendors nationwide.

Equator PRO is a highly configurable and scalable workflow automation solution that help servicers, outsource providers and third-party vendors efficiently and effectively manage delinquencies. Combined with Altisource's full suite of scalable and data-driven solutions (online marketing and auctions, field services, valuations and title services), servicers can streamline the entire default process, supporting client-determined compliance requirements, reducing cycle times and lowering costs.

### **HOW WE HELP**

Originally built for big servicers, Equator has been optimized with flexible features, making it easy and affordable for clients with any size default portfolio. Clients can adopt individual products to fill gaps in their current process or combine all the products for a complete end-to-end default system.

- 📈 **Affordability** – Pay for only what you use via Equator PRO
- 📈 **Scalability** – Ability to adopt suite of products as needed

- 📈 **Flexibility** – Offers a modern business process model and notation (BPMN) workflow technology, making it easy to scale as you grow
- 📈 **Promotes Growth** – Integrates with most servicer systems, vendor networks and more
- 📈 **Manage Risk** – Simplifies audits by keeping all documents and messaging in one place
- 📈 **Stay Connected** – Provides transparency and communication between vendors, servicers, real estate agents and consumers
- 📈 **Easy Activation** – Same-day go-live and no client tech resources required
- 📈 **FHA Default Modeling Tool** – Projects costs and recommends optimal disposition strategies

### **INVESTING IN THE FUTURE**

Equator remains as a leader in workflow technology, heavily investing in product enhancements and leading-edge technology for the future of servicer clients, vendors, real estate agents and consumers. Upcoming product releases include easy onboarding with less custom development and modern messaging applications, APIs, searching and reporting.
